Art Unit: 2878

1. Figures 6-8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The disclosure is objected to because of the following informalities:

On page 8, line 4, "10000" should be changed to --1000--.

On page 11, line 23, "200" should be changed to --2000--.

Applicant's cooperation is requested in correcting any additional errors of which applicant become aware in the specification.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Harrold et al.

Harrold et al shows in Figs.7-11 the following elements of applicant's claim; a) a filter device has a lenticular part (88) capable of expanding a scanning laser beam (a scanning optical system 91 comprises a laser source 206) in a scanning direction in which the laser beam moves and a diffusing part (col.9, lines 9-11) capable of diffusing the laser beam transmitted by the lenticular part; and b) a photodetecting means (205a, 205b) provided with a plurality of photodetectors.

Art Unit: 2878

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrold et al.

Regarding claim 3, the specific material used for diffusing light would have been obvious to one of ordinary skill in the art in view of design requirements, manufacturing cost, the availability of part, etc.

Regarding claim 5, the specific utility of which a claimed apparatus is intended to be employed would have been obvious to one of ordinary skill in the art in view of the desired performance.

7. Claim 4 is allowed.

8. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter:

The prior art (i.e. Harrold et al) does not disclose or make obvious a laser beam receiver for receiving a scanning laser beam comprising, in addition to the other features of the claim, a plurality of photodetectors are arranged on a line perpendicular to a scanning direction in which the laser beam moves for scanning.

Art Unit: 2878

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamazaki et al is cited for disclosing a beam position detector.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Pyo whose telephone number is 703-308-4841. The examiner can normally be reached on Mon-Fri (with flexible hour), First Mon. off.
